List of Tables.

Table 1: User Roles and Responsibilities.	5
Table 2: Reports, Receipts and Records.	32

1. System Overview and User Roles.

The HealthCare Plus Online Hospital Management System is a web-based system designed to replace selected manual hospital processes with a centralized digital workflow. The project report identifies patient registration, appointment scheduling, doctor and staff administration, billing/payment, reporting, notifications, feedback and an AI-powered symptom checker as major functions. The system uses role-based access so that different users see functions appropriate to their responsibilities.

Role	Main activities
Patient	Create account, log in, manage profile, search doctors/availability, book or cancel appointments, make payments, view booking history, access personal records/reports, submit feedback, use symptom checker.
Doctor	Log in, view schedules and appointments, view patients who booked appointments, access relevant patient information, generate medical reports, view feedback/notifications.
Admin	Manage doctors, patients, user privileges, appointments, schedules, feedback, reports, notifications and system statistics, issue receipts and manage operational information.

Table 1: User Roles and Responsibilities.

2. Accessing the System.

For the local development/deployment environment, the project is intended to run on a local XAMPP server. The report specifies localhost during development and a local server/intranet for initial deployment.

1. Start Apache and MySQL from the XAMPP Control Panel.
2. Open Google Chrome or Microsoft Edge.
3. Enter the local application address configured during installation, normally (Example: <http://localhost/FinalUpdated/FinalProject/index.php>) when the supplied folder name is kept unchanged.
4. The home page provides navigation such as Home, Doctors, Services, About and Contact.
5. Select Login and enter the username/password for the correct user category.
6. After successful authentication, use Logout when finished.

Figure 1: XAMPP Control Panel.

3. Patient User Guide.

3.1. Create a patient account.

1. Open the system home page and select the registration/sign-up option.
2. Enter the requested personal details, including name, address, identity card number, date of birth, email, contact number and password.
3. Enter the password again for confirmation.
4. Submit the form and wait for the account-creation confirmation.
5. Return to Login and sign in with the registered credentials.

Figure 2: Home Page.

The registration page features a light blue background with a white central form. In the top left corner, there is a blue button labeled "← Back to Home". The form is titled "Let's Get Started" in bold black text, followed by the subtitle "Add Your Personal Details to Continue". Below this, a note states: "This signup is for patients. Doctors should contact admin." The form contains several input fields: "Name:" with sub-fields for "First Name" and "Last Name"; "Address:" with a single text field; "NIC:" with a "NIC Number" field; and "Date of Birth:" with a field showing "mm/dd/yyyy" and a calendar icon. At the bottom of the form are two buttons: a light blue "Reset" button and a dark blue "Next" button. Below the form, a link reads "Already have an account? [Login](#)".

Figure 3: Registration Page for New User.

The login page has a light blue background with a white central form. In the top left corner, there is a blue button labeled "← Back to Home". The form is titled "Welcome Back!" in bold black text, followed by the subtitle "Login with your details to continue". The form includes two input fields: "Email:" with a sub-field for "Email Address", and "Password:" with a "Password" field. Below these fields is a dark blue "Login" button. At the bottom of the form, a link reads "Don't have an account? [Sign Up](#)".

Figure 4: Login Page.

3.2. Patient dashboard.

- View summary information such as doctors, patients, bookings and sessions.
- Search doctor availability.
- Create a new appointment.
- Open booking history.
- Update profile information through settings.
- Access notifications and other patient functions available in the deployed build.

Figure 5: Patient Dashboard.

3.3. Book an appointment.

1. Open the appointment/booking function.
2. Search for an available doctor/session.
3. Select the required doctor and available session/date.
4. Review the session information, including doctor, schedule date, consultation fee, hospital fee and appointment number.
5. Submit the booking.
6. Complete payment when required by the workflow.
7. Check the resulting booking status and confirmation.

Figure 6: Available Sessions.

Figure 7: Booking Details.

3.4. View or cancel a booking.

- Open Booking History.
- Review booking date, reference number, appointment number, doctor, schedules date and status.
- Use the cancellation function when cancellation is permitted.
- Re-check the status after the action.

Figure 8: Cancel Booking.

Figure 9: Confirmation of Cancel the Booking.

3.5. Make a payment.

- Open the Payment function for the relevant appointment.
- Review the appointment details and displayed amount.
- Enter the payment information requested by the deployed payment page.
- Submit the transaction.
- After successful processing, retain the receipt/payment confirmation.
- Use payment history/reports to review previously recorded payments where available.

The screenshot shows a patient portal interface for 'Secure Payment Processing'. On the left is a sidebar with a patient profile (dinuedirisinghe00078@gmail.com) and navigation links: Home, All Doctors, Scheduled Sessions, My Bookings, My Payments, and Settings. The main content area has a 'Back' button and the title 'Secure Payment Processing' with the subtitle 'Complete your appointment booking with confidence'. The 'Appointment Details' section lists: DOCTOR: Dr. Anjana Kularatne, SPECIALIZATION: General, SESSION TITLE: Check Patient, DATE & TIME: September 21, 2026 at 3:00 PM, and a FEE BREAKDOWN showing Consultation Fee: LKR 3,000.00 and Hospital Service Fee: LKR 500.00, with a Total Amount: LKR 3,500.00. To the right is a 'Direct Card Payment' section with a card icon, instructions to enter card details, a 'PROCEED TO SECURE PAYMENT' button, and security badges for 256-bit SSL Encryption and PCI DSS Compliance.

One Page Patient Health Status Report

This one page shows the medical health summary. It covers all the patient personal and medical details including patient information, all performed surgeries, medications, current illness and medical history of the patient.

Patient Information

Patient Name	Aditi Narsingh Thapa
ID Card No.	9876543210
Address	Aditi Narsingh Thapa
Age	28 (20/07/2001)
Weight (kg)	65
Height (cm)	165

Patient Medications

Medication	ABP	Dosage	Frequency	Used for
Paracetamol	AS	Tablet 500mg	4 times	Fever
Mention other medicines here				

Medical History Overview

Date	Provision	Target	Medical Condition
10/01/2025	140/90 mmHg	130/80 mmHg	High Blood Pressure
10/01/2025	140/90 mmHg	130/80 mmHg	High Blood Pressure
10/01/2025	140/90 mmHg	130/80 mmHg	High Blood Pressure

Current Illness & Conditions

✓ Asthma		
✓ Diabetes	✓ Type 1 (IDDM)	✓ Type 2 (NIDDM)
✓ Tuberculosis		
✓ Thyroid		

All Surgeries & Hospitalization

Year	Surgery Performed/Reason for Hospitalization	Symptoms
2021	Heart surgery	Chest pain
2021	Heart and surgery done in previous year	Heart and symptoms here

Any Other Allergies

Allergy	Reaction	Year
Shrimp allergy	Redness	2021
Mention allergy here	Mention reaction here	2021
Mention allergy here	Mention reaction here	2021

Figure 13: View Reports.

3.7. Use the AI-Powered symptom checker.

1. Open the AI-Powered Symptom Checker.
2. Enter the symptoms requested by the system.
3. Submit the information.
4. Read the returned preliminary guidance.
5. Use the system's recommendation to consider booking and appointment when appropriate.

Figure 14: AI-Powered Symptom Checker.

Figure 15: Feedback Submission.

3.8. Update profile and account.

- Open Settings/profile.
- Review the displayed personal information.
- Edit permitted fields.
- Save the changes and confirm the updated information is displayed.
- Use the account-delete function only you understand the consequences and hospital policy permits it.

Figure 16: Update Profile and Account.

4. Doctor User Guide.

4.1. Doctor dashboard.

- Log in using the Doctor role.
- Review the dashboard summary of doctors, patients, bookings and sessions.
- View upcoming sessions, appointments and feedback/notifications.
- Use the navigation menu to access schedules, patients, reports and settings.

Figure 17: Doctor Dashboard.

4.2. View schedules.

- Open doctor schedules.
- Review session title, scheduled date/time and maximum booking capacity.
- Use the available event/actions controls provided by the deployed system.

Figure 18: Doctor Schedules.

4.3. View booked patients.

- Open patient list.
- Review patients who have booked an appointment.
- Use the displayed patient information only for legitimate hospital work.

The screenshot displays the 'Appointment Manager' interface for Dr. Anjana Ku. The left sidebar contains navigation links: Dashboard, My Sessions, My Appointments (selected), My Patients, Feedback, Health Tips, Patient Documents, and Settings. The main area shows 'My Appointments (9)' with a search bar for Date (mm/dd/yyyy) and Patient (Patient Name), and a Filter button. Below is a table of appointments with columns: Patient name, Appointment number, Session Title, Session Date & Time, Appointment Date, and Events. Each row has a 'Cancel' button in the Events column.

Patient name	Appointment number	Session Title	Session Date & Time	Appointment Date	Events
Dinu Rathnayake	1	Check Patients	2026-07-02 @16:00	2026-06-30	Cancel
Dinu Rathnayake	1	Check Patient R	2026-07-08 @16:00	2026-07-02	Cancel

Dinu Rathnayake	1	Check Patient	2026-09-21 @15:00	2026-09-20	Cancel
Dinithi Edirisinghe	2	Check Patient R	2026-07-08 @16:00	2026-07-02	Cancel
Shehani Edirisinghe	2	Check Patients	2026-07-02 @16:00	2026-06-30	Cancel
janitha ruberu	3	Check Patients	2026-07-02 @16:00	2026-07-01	Cancel
Nethmal Nethu	3	Check Patient R	2026-07-08 @16:00	2026-07-03	Cancel

Figure 19: Booked Patients.

4.4. Generate medical reports.

1. Open the medical-record/report function.
2. Select the relevant patient/appointment according to the deployed workflow.
3. Enter or upload the required medical information.
4. Generate/save the report.
5. Verify that the report is associated with the correct patient and appointment.

The screenshot displays a web application for generating patient documents. On the left is a sidebar for user Dr. Anjana Ku., with a 'Log out' button and a menu containing 'Dashboard', 'Sessions', 'My Appointments', 'My Patients', 'Health Tips', 'Patient Documents' (highlighted), 'Feedback', and 'Settings'. The main area is titled 'Generate Patient Document' and includes a date display for '2026-09-20'. The central form, 'Generate New Patient Document', contains fields for 'Select Patient' (a dropdown), 'Document Type' (a dropdown), 'Document Title' (a text input), and 'Document Content' (a large text area). Below these is an 'Upload Image (optional)' section with a 'Choose File' button and a note about allowed formats: JPG, JPEG, PNG, GIF, BMP. A blue 'Generate Report' button is at the bottom of the form.

Figure 20: Generate Patient Reports.

4.5. Notifications and logout.

- Check doctor notifications for appointment or system messages.
- Complete required work before leaving the system.
- Select Logout to terminate the session.

Figure 31: Patient Notifications.

6. Notifications, Feedback and Symptom Checker.

6.1. Email notifications.

- Appointment confirmation can trigger an email notification.
- Cancellation notifications are part of the documented email workflow.
- Medication reminders and daily schedules are also identified as notification events.
- Email delivery depends on correct server-side email/API configuration.

Figure 32: Email Notifications.

6.2. Feedback workflow.

Patient → Submit Feedback → Administrator receives notifications → Administrator replies → Patient views → Response

6.3. Symptom-checker workflow.

Patient enters symptoms → System sends the information to the AI model → AI returns possible conditions/preliminary guidance → Patient is advised to consider an appointment.

7. Reports, Receipts and Records.

Output	Typical user	Purpose
Appointment report	Admin	Review appointment activity and operational information.
Payment report	Admin/Authorized users	Review recorded payment information.
Doctor report	Admin	Review doctor-related information.
Patient report	Admin	Review patient-related information.
Patient documents/medical reports	Doctor/Patient as authorized	Provide access to relevant medical documentation.
Receipt	Admin/Patient	Confirm a payment transaction.

Table 2: Reports, Receipts and Records.

8. Security and Good Operating Practice.

Use only your assigned account and role.

Never disclose passwords or leave a logged-in session unattended.

Check patient identify before viewing or entering records.

Confirm appointment details before payment or confirmation.

Use the system only for authorized hospital work.

Log out when finished.

Keep database backups protected because they can contain sensitive hospital information.

Do not place real patient information into screenshots, demonstrations or public repositories.
